

## Smart Business Communication Solutions

### Telecom 101

We take the time to educate potential clients on the world of telecom, empowering them to make more informed decisions.

### Project Peace of Mind

The last thing you need is another "make work" project. We get that. By taking on the responsibility of making the phone system project a success, we ensure accuracy, efficiency & no headaches for you

### The Whole Team Theory

A new phone system is not just important to you, it's important to your whole team. We make sure all members are highly trained, feel supported & understood. After an installation, anyone can call us, anytime within 30 days, at no charge.

### The Future

Tech is ever changing and when making a large investment you can't afford to be left in the dust. We make the commitment to continually educate ourselves as leaders in the telecom/networking industry & relay this information to our clients.

## Telecommunication Consultation & Design

With a little research into your business, we can provide relevant information about the world of telecom and make recommendations for custom solutions. We have unique ideas that will modernize existing technology; increasing productivity, reducing operational expenses and giving your business a competitive edge.

## Integrated Phone System & Network installation

Our technical engineers will work with your IT team to design, install & support integrated phone systems and networks. Our innovative yet credible approach to telecommunications allows us to provide custom, high functioning solutions for our clients.

## Cabling Installation

Need 1 new wall jack installed? No problem. We offer flat rate installation for jobs of all sizes. For new builds, our team of design specialists can quote & design complete cabling networks. We can also make recommendations on how to improve the overall performance of existing networks.

## Telecom Analysis

With a simple phone bill review, we'll show your business how to simplify complex billing, improve service quality & reduce operational costs associated with communications.

## Training and Support for Staff Members

We provide extensive user training with all new installations and our account managers are always on hand to answer questions and provide, quick resolutions. We also offer advanced or basic system management training, giving businesses the tools to manage systems internally.

## Interconnect With Service Providers

We deal with your service provider for you! Say good bye to call centers & long hold times. We work with your service provider to place requests & technical concerns on your behalf, keeping you in the loop and providing updates on the status of your order along the way

***With the guidance and expertise of Sceptre Communications your business will learn how to leverage telecommunications technology in ways that will increase profitability and give your business a powerful competitive edge***
